

# SUMMER SCHOOL IN EURO-MEDITERRANEAN STRATEGIES INTERNATIONAL SUMMER MEETING

21-23 JULY 2011 MARATEA ITALY

WE ARE THE HEART OF MEDITERRANEAN

## PRESENTATION

The Mediterranean area is the stage of complexity par excellence, where intersect different cultural, political and economic worlds. Both the colonial past and the forms of ideological contrasts and power, as well as the establishment of the Communitarian Europe, have created many asymmetries in development.

The Mediterranean area is a relatively small space, but it is also complex and, with its economic imbalances, political instability, conflicts, migration dynamics, religious fundamentalism, scarcity of resources and environmental difficulties, it reproduces on a regional scale the global system's problems.

The enlarged Mediterranean, that comprehend also the Middle East, is a place rich of opportunities, with financial and energetic resources that are seeking allocation.

The second edition of the summer meeting in Maratea devotes three days to some relevant themes to understanding the Mediterranean area and its geopolitical and economic dynamics, offering participants the possibility to meet experts on the subject, to exchange opinion and gain useful information.

## OBJECTIVES

The meeting intends to deepen some themes connected to the Mediterranean area, crucial to understand whether to effectively operate in the area. IASEM proposes an open debate on specific issues with the presence of experts on the subject, in order to generate reflections and stimulate knowledge. The objective is to offer interpretative instruments to understand the balance of powers, opportunities and the complexity of the area. Understand the Mediterranean area is a decisive challenge for our times, when geopolitical and economic interests are clearly shifting in a sudden and evident way to the countries of this area.
